Date of Creation

October 1, 2004

Stated Capital

37 million JPY

Number of Employees

6 Founders (60 Employees)

Business Lineup

Wholesale of Organic Products and Raw Materials,
Commission Processing, Re-packing, Product
Planning, others.

Board Members

President Mr. Toshihiko Furuno
Vice President Mr. Toshimichi Furuno
Managing director Mrs. Fusako Furuno
Auditor Mr. Kenji Moriwaki

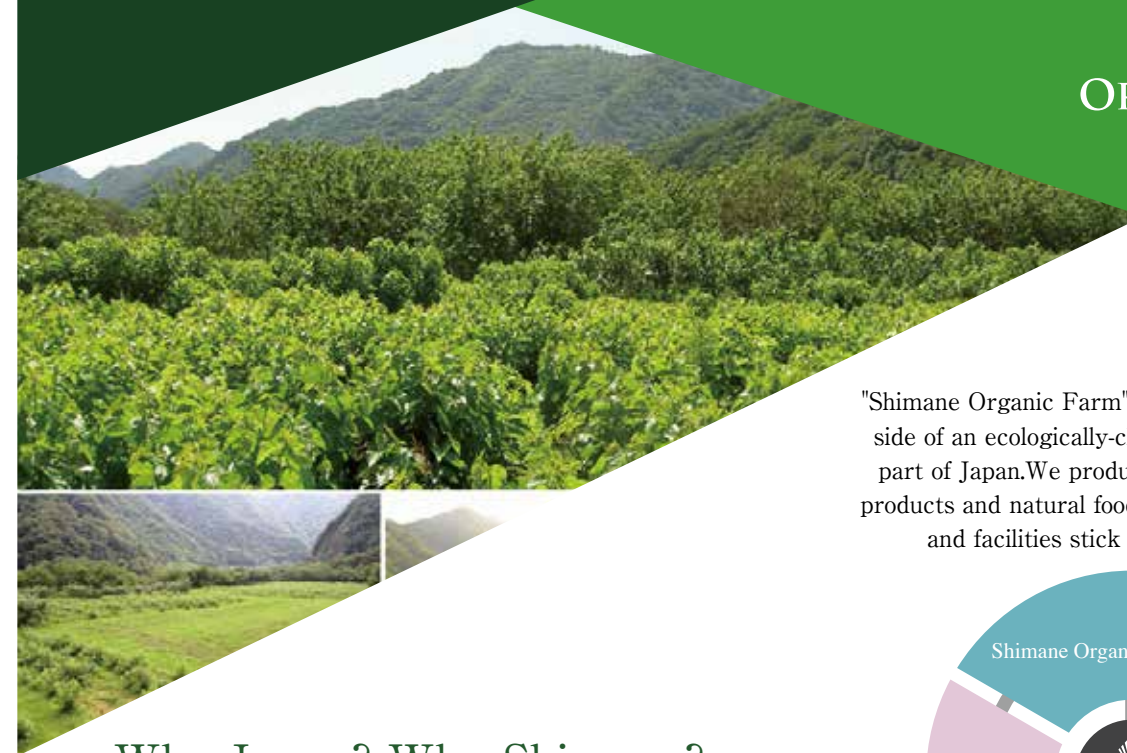

Affiliated Companies

Sakurae Mulberry Tea P.U. Co., Ltd
Yuki-no Misato Co., Ltd

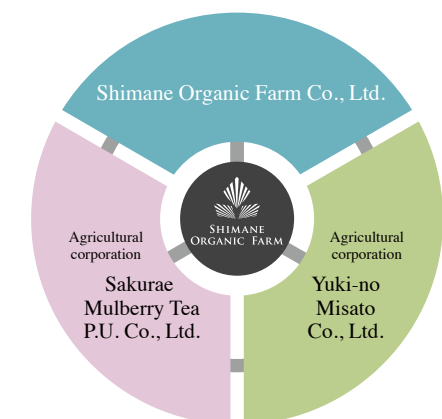

Certificates

Organic JAS Certificate for Producing of Organic Agricultural Products
Organic JAS Certificate for Processing of Organic Foods
Organic JAS Certificate for Re-packing of Organic Foods
Organic JAS Certificate for Importing of Organic Foods
PCQI Certificate (by FSPCA)
ISO 22000 (from 2018 year)

High quality products from the land of Shimane

"Shimane Organic Farm" is located in the country-side of an ecologically-clean area in the Western part of Japan. We produce healthy and delicious products and natural food ingredients on our fields and facilities stick to organic methods.

Why Japan? Why Shimane?

Japan is renowned for not only its unique culture but also its rich culinary and agricultural traditions. With about 75% of its territory consisting of mountains, these natural formations serve as barriers, safeguarding farmland from the harmful effects of industrial emissions. The Japanese government also places great emphasis on environmental safety. This gives agricultural products originating from Japan a reputation for being eco-friendly and safe.

Our facilities are situated in Shimane Prefecture, located in Western Japan, far away from major cities. Shimane Prefecture is celebrated for its ancient shrines, soothing hot springs, breathtaking wildlife, and landscapes that have remained unchanged for ages. As one of the least densely populated and minimally industrialized regions in Japan, it boasts an exceptional ecological purity.

In this region, people live in harmony with nature, fostering an environment conducive to the growth of outstanding agricultural products. The mountains encircling our fields provide optimal conditions for cultivating healthy and delicious organic goods.

What is "Shimane Organic Farm Group"?

Shimane Organic Farm group includes two corporations which have organically-approved fields and facilities for the processing of raw materials and their final products. We have Organic JAS certifications for cultivating, processing, and re-packaging of organic materials and products.

Business Lineup :

- Export of organic materials
- Export of organic products
- Re-packing
- Product planning
- Contract processing
- Research of functional food

Our Mission :

We provide our customers with raw organic materials, health products and super foods produced domestically in Japan.

Cultivation and processing of final product-oriented materials is achieved together with the introduction of materials dependent on customer needs.

In an era of rapid change and movement, the development of additional products is natural. However, we do not simply want to just expand our inventory. We strive to create the highest-quality products with the intent of not unnecessarily raising the variety of products we sell.

We aim to provide more delicious, safe, and reliable products which will make our customers say "I want to have that again!"

SHIMANE ORGANIC FARM

<https://www.shimaneorganicfarm.com>

How we process our products at our organically-approved plants

We offer various methods for processing organic products in our JAS certified facilities. We accept individual orders for the following: cutting/grinding, tea packing, drying, repacking and refilling, roasting, and separation of foreign particles. Please feel free to contact us!

Cutting/Grinding

Preserving the natural power of agricultural products

We accept orders for cutting and grinding of harvested crops. We offer cutting services to maximize the potential of your materials. Size and form can be changed according to specifications.

Tea Packing

Striving for the best, even in the smallest details

We pack tea leaves, herbs, etc. in different types of tea bags including unbleached paper to make our products more sustainable and eco-friendly.

Drying

Drying methods change depending on the final product.

Our drying methods vary depending on the use of the product to ensure quality. If nutrients are easily destroyed, we utilize low temperature drying to preserve the material's properties. We offer the most appropriate method for you.

Re-Packing and Filling

High-Precision Technology

We offer many repacking options for your products. We package powdered or dried products into 10g units or more. We also manage small lots.

Roasting

Honed skills - highest quality

The level of roasting is crucial in the quality of end products. One of our methods is slow roasting using a kneader with an open flame. Our masters expertly roast easily burnable materials such as leaves.

Separating Foreign Substances

For 100% certainty

We remove foreign substances from processed raw materials through vibration screening, weight comparison, and removal of metal particles with magnets.

Slicer We offer various forms of slicing for root vegetables and leafy vegetables

Cabbage (shredded)

Root vegetables (thin slices)

Cabbage (small squares)

Lettuce (thin slices)

Scallion (round slices)

Scallion (chopped)

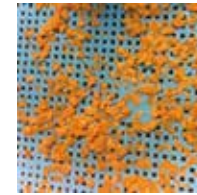

High Speed Cutting Machine High speed cutter for slicing soft fruits and vegetables.

Bitter melon (round slices)

Burdock (round slices)

Carrot (thin slices)

Citron/"YUZU" (Round slices)

Other Cutting machine with mesh screen
We can grind dry vegetables or tea leaves into 2.5-22 mesh pieces.

Tea Bag Processing

Tea packing machine with weighing mechanism

Product inspection and sealing

Tea packaging

Tea bag choices
·unbleached paper
·non-woven fabric

Drying

Washing

Slicer/Paste Machine

Blancher

Drying

Drying lines

- Low temperature batch method hot wind drying line
- Blanching method hot wind drying line
- Saturated vapor method hot wind drying line

Achievements in processing

We have experience processing Mulberry, Young Adlay Grass, Kale, Ginger, Basil, Spinach, Japanese Mustard Spinach, Carrot, Lemon Grass and other herbs, Hibiscus, Persimmon Leaves, Green Tea, and Tochu Tea.

Young sesame leaves, Oat, Sword bean, Chili paper, Broccoli, Onion, Japanese horseradish, Peruvian ground apple, Japanese mugwort and others.

We can manage organic and non-organic ingredients as well

Separation

Pneumatic Separator

Used for separating pebbles and improperly dried pieces of material.

Metal Detector

We can adjust the magnetic flux to the following ranges according to raw materials:
Fe: 0.6 Φ and more Sus: 0.8 Φ and more
It removes metallic foreign matter that could not be removed by a magnet.

Color-sorting Machine

It is possible to sort discolored, defective products. We use it to sort grains such as barley, coix, and unpolished rice.

Other Services

Grinding Machine

Could be used for grinding the materials to 2.5-22 mesh. Grinding for tea is possible as well.

Nitrogen Filled Aluminum Bag Packaging

Used when stocking raw materials. Protects raw materials from oxidation and deterioration from UV light.

Warehouse Storage

We can stock your raw materials after being processed. Partition delivery is available. Please feel free to contact us!

Mulberry Herb

Mulberry Herb Teas

Organic Mulberry Tea

Ingredients: Organic Mulberry Leaves (JAPAN).
Net weight: 37.5g (2.5g x 15 tea bags)
Quantity per case: 36

Organic Mulberry Tea

Ingredients: Organic Mulberry Leaves (JAPAN).
Net weight: 90g (2.5g x 36 tea bags)
Quantity per case: 30

Organic Mulberry Tea

Ingredients: Organic Mulberry Leaves (JAPAN).
Net weight: 100g (loose leaf)
Quantity per case: 40

Mulberry Tea

Ingredients: Mulberry Leaves, Mulberry Branches (JAPAN).
Net weight: 72g (2g x 36 tea bags)
Quantity per case: 20

Herb

Organic Green Juice Powders

Mulberry Matcha

Ingredient: Organic Mulberry Leaves (JAPAN).
Net weight: 100g
Quantity per case: 60

Organic Green Juice "Aojiru" (30 sticks)

Ingredients: Organic Mulberry Leaves (JAPAN), Dextrin.
Net weight: 90g (3g x 30 sticks)
Quantity per case: 20

Mulberry Matcha

Ingredient: Organic Mulberry Leaves (JAPAN).
Net weight: 20g
Quantity per case: 50

Mulberry Matcha Blend

Ingredients: Organic Mulberry Leaves (50%), Organic Green Tea (50%).
Net weight: 20g
Quantity per case: 50

Mulberry Matcha Special

Ingredients: Organic Mulberry Leaves (80%), Organic Green Tea (20%).
Net weight: 20g
Quantity per case: 50

Supplements

Organic Mulberry Leaf Tablets

Ingredients: Organic Mulberry Leaves (JAPAN).
Net weight: 24g (0.2g x 120 tablets)
Quantity per case: 30

Organic Mulberry Leaf Tablets

Ingredients: Organic Mulberry Leaves (JAPAN).
Net weight: 200g (0.2g x 1000 tablets)
Quantity per case: 40

Organic Mulberry Leaf Tablets

Ingredients: Organic Mulberry Leaves (JAPAN).
Net weight: 72g (0.2g x 360 tablets)
Quantity per case: 120

Recipes What to use Mulberry Powder for

Green Smoothies

Green Pancakes

DNJ

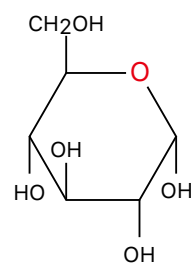

Mulberry leaves contain substances that support well-being, and have been used in traditional medicine for a long time

Recent research has revealed that mulberry leaves contain DNJ (1-deoxynojirimycin). DNJ may help in reducing blood sugar levels and preventing diabetes by inhibiting α -glucosidase activity.

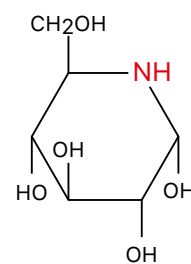

DNJ (1-deoxynojirimycin) is a unique component.

Because the chemical structure of DNJ is similar to glucose, DNJ inhibits decomposition of disaccharides to monosaccharides by antagonizing maltase and sucrase of the small intestine involved in carbohydrate absorption.

DNJ is similar to glucose

Glucose

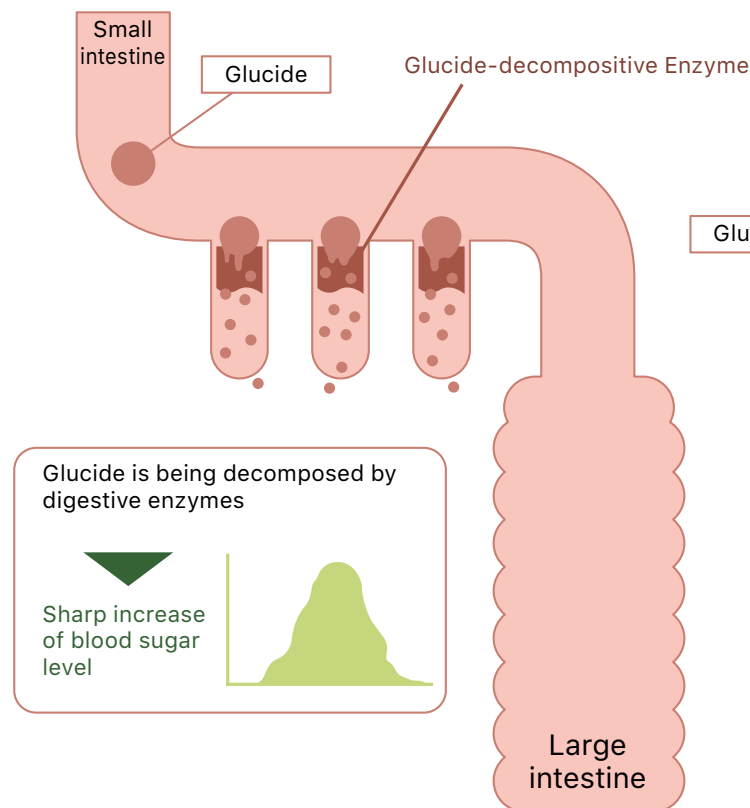

DNJ
1 - deoxynojirimycin

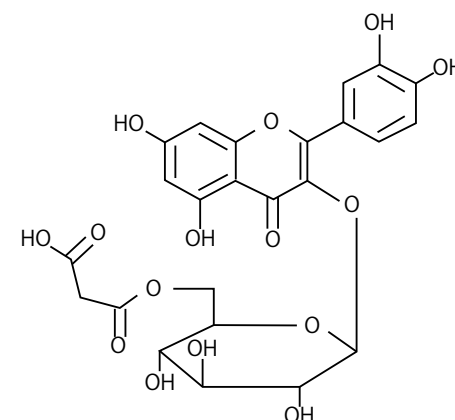

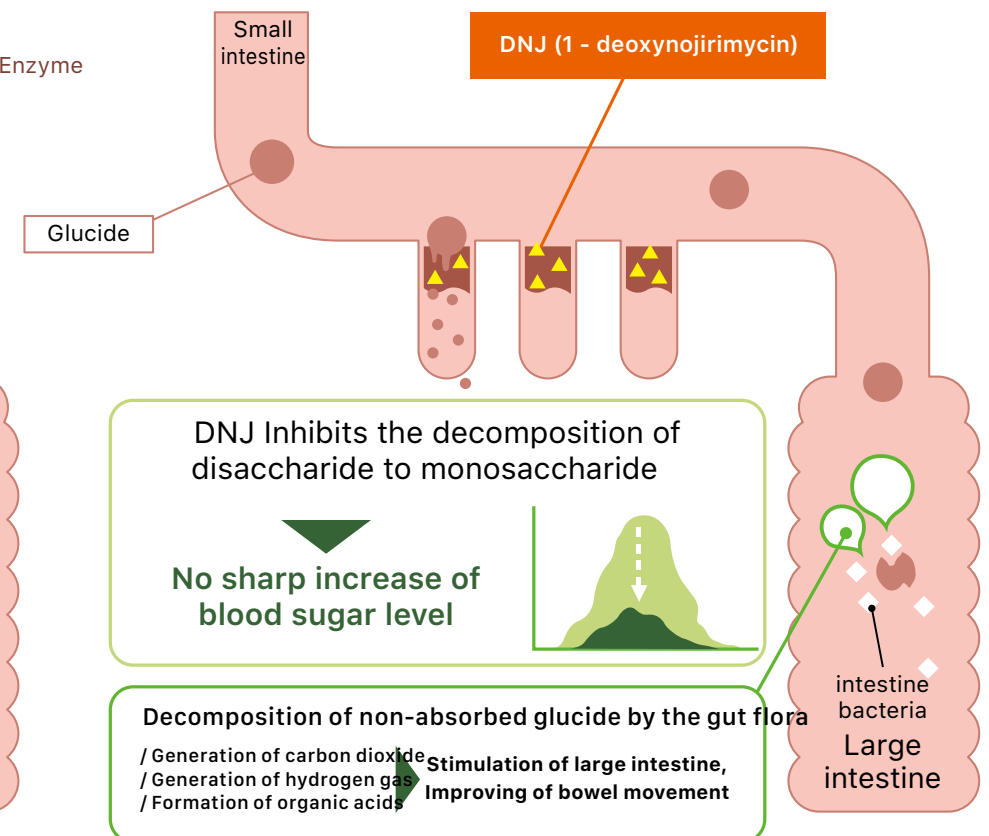

Glucose is decomposed by digestive enzymes and absorbed in the form of monosaccharides from the small intestine, but when it is inhibited by the DNJ from disaccharide to monosaccharide it is not absorbed in the small intestine. This results in the postprandial rapid rising of blood sugar level being suppressed.

Carbohydrates not absorbed in the small intestine are transported to the large intestine and are broken down by the bacteria present in the large intestine. At that time the generation of carbonic acid gas and hydrogen gas, and the formation of organic acids such as acetic acid and lactic acid will cause stimulation of the colon and improve of bowel movement.

When you **do not** take **DNJ**

When you take **DNJ**

Q3MG Quercetin 3-(6-malonylglucoside)

Q3MG

Our mulberry leaves also contain Q3MG (Quercetin 3-(6-malonylglucoside), according to the research we had conducted in collaboration with Shimane Institute for Industrial Technology, and Faculty of Medicine at Shimane University. Q3MG may help in preventing arteriosclerosis and oxidation of LDL-cholesterol*. The content of Q3MG in mulberry leaves from Shimane in Japan is higher than that in mulberry leaves from any other places.
